

WRITING A SCIENTIFIC PAPER: a step-by-step guide

Wednesday **15 February** 2024 Hour: **11:00-15:00**
Aula Cartografia, Università degli Studi dell'Insubria, Via Valleggio 11, **Como**

PhD lecturer: **Ramona Giurea**

“Lucian Blaga” University of Sibiu & “Nicolae Balcescu” Land Forces Academy, Romania

Class Introduction:

Writing scientific papers is a challenge for many young researchers, and few receive specific training in how to present their research in written form. However, publishing is often necessary for advancing a career, obtaining funding, gaining academic qualifications, or all of the aforementioned. This course describes the basic steps to be followed when writing a scientific paper. It outlines the main sections that an average article should include, the elements that should appear in these sections, and some tips on how to make the overall result attractive and acceptable for publication.
